

Name: _____

Date: _____

EARLY ALGEBRA

LEVEL 5: SIMPLE FORMULAS

1 Use the formula!

Use the formula to fill in the table.

Formula:

Number of wheels = $2 \times$ number of bikes

Number of bikes	1	3	5	7	10
Number of wheels					

How many wheels are there if there are 9 bikes?

2 Use the rule!

Use the rule to complete the table.

Rule:

Legs = $4 \times$ number of dogs

Number of dogs	2	4	6	8	11
Total legs					

How many legs are there if there are 12 dogs?

3 Use the formula!

Use the formula to solve each problem.

Formula:

Stickers = $3 \times$ packs

1 How many stickers in 1 pack?

2 How many stickers in 4 packs?

3 How many stickers in 7 packs?

4 How many packs are needed for 24 stickers?

4 Challenge!

Use the rule to find the missing outputs.

	Input (n)	Rule	Output
1	5	Output = $5 \times n$	
2	9	Output = $3 \times n + 1$	
3	7	Output = $2 \times n + 4$	

4 Think of your own rule.
Use $n = 6$.

My rule: _____

Output when $n = 6$:
