

My Science Report

One page for one experiment. Draw as well as write.

Name _____ Date _____

My question

What I think will happen

What I used

What I did

What happened

What I found out

Lab Report

Record as you go. An unsupported hypothesis is still a result.

Name _____ Date _____

Investigation _____

Question

Hypothesis Testable, and phrased so it could be shown wrong.

Materials and equipment

Procedure Enough detail for someone else to repeat it exactly.

Observations Qualitative notes; anything unexpected.

Results Data with units. Attach or sketch your table or graph.

Conclusion Supported or not supported? What are the sources of error?

Lab Report

Fill this in as you work, not afterwards from memory.

Name _____ Date _____

Investigation _____

Question What are you trying to find out?

Hypothesis If ... then ... because ...

Materials

Procedure Numbered steps someone else could follow.

Observations and results What you measured or saw. Use a table if it helps.

Conclusion Answer the question. Did the results support your hypothesis?
