Big Brighter Worlds! ♥

Nature
Makes Life
Amazing!

Name: _____ Date: _____

A

Match each animal to what it eats.

rabbit

frog

lion

caterpillar

fly

grass

deer

leaf

B

Circle the producer.

In each row, circle the living thing that is a producer (makes its own food).

grass

rabbit

fox

tree

deer

wolf

algae

fish

seal

C

Fill in the blanks using the word bank.

Word Bank: sun food animals energy

- Food chains begin with the _____.
- Green plants make their own _____.
- Many _____ eat plants or other animals.
- Food gives living things _____.

The sun
helps plants
make food!

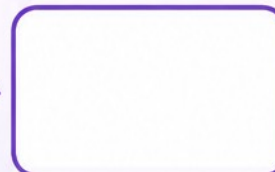

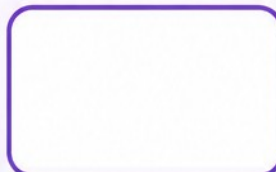

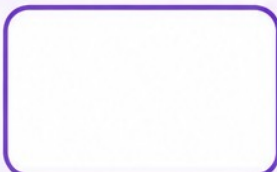

Plants
are the start
of many
food chains!

D

Challenge: Draw a simple food chain.

Draw a plant, then an animal that eats it, then another animal that eats that animal.

Be creative!
There are many
right answers!

Food chains show who eats what!

Healthy

World! ♥

Nature
Makes Life
Amazing!

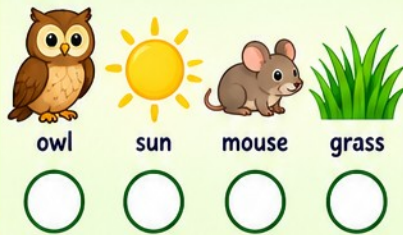

A Put the food chains in order.

Write 1-4 in the circles to show the correct order.

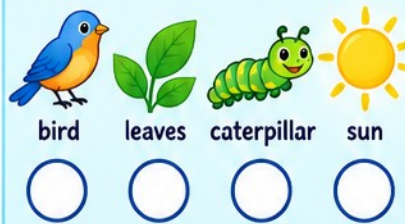

Food chains
show how
energy moves!

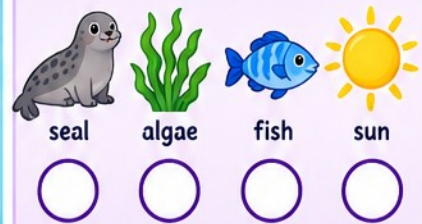

1 Forest Food Chain

2 Garden Food Chain

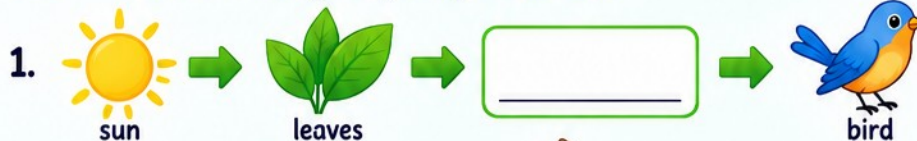

3 Ocean Food Chain

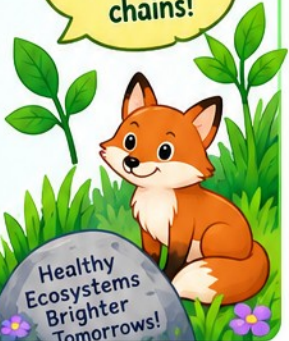

B Complete the food chains.

Write the missing living thing in each box.

Plants start
many food
chains!

Healthy
Ecosystems
Brighter
Tomorrows!

C Tick the producer.

Tick the living thing that makes its own food.

- | | | | | | | |
|----|--|----------------------------------|--|--------------------------------|--|-------------------------------|
| 1. | | ☐ grass | | ☐ cow | | ☐ lion |
| 2. | | ☐ lettuce | | ☐ snail | | ☐ frog |
| 3. | | ☐ algae | | ☐ fish | | ☐ seal |
| 4. | | ☐ tree | | ☐ deer | | ☐ wolf |

D Explain

Why are green plants important in a food chain?

Green plants
give food and energy
to many living things!

Topic 5: Food Chains & Ecosystems | Worksheet 3

Name: _____ Date: _____

Living Things Make a Brighter World! ♥

Explore Learn Protect Our Planet! ♥

A Sort them.

Tick producer or consumer for each living thing.

Living Thing	Producer	Consumer
 grass	☐	☐
 rabbit	☐	☐
 tree	☐	☐
 fox	☐	☐
 algae	☐	☐
 fish	☐	☐

B Match each word to its meaning.

1. producer • •

A. an animal hunted by another animal

2. consumer • •

B. a living thing that eats plants or animals

3. predator • •

C. a living thing that makes its own food

4. prey • •

D. an animal that hunts other animals

C Write producer or consumer.

1.  sunflower _____

2.  cow _____

3.  seaweed _____

4.  owl _____

D Explain.

How is a producer different from a consumer?

Different living things depend on each other! ♥

Together! ♥

B Answer the questions.

1. Name two animals that eat plants. _____
2. Which animal eats the mouse? _____
3. Which animal eats the grasshopper? _____
4. What might happen to rabbits if there is less grass? _____

5. What might happen to foxes if there are fewer rabbits? _____

C True or False?

Circle the correct answer.

1. An owl is a producer. ☐ True ☐ False
2. A rabbit is a consumer. ☐ True ☐ False
3. Grass gets energy from the sun. ☐ True ☐ False
4. If there are fewer mice, the owl may have less food. ☐ True ☐ False

Small Changes
Can Make a
Big Difference! ♥

D Challenge

Explain how one change in a food web can affect other living things.

If one food source
changes, other animals
may be affected too!

Name: _____ Date: _____

Explore
Learn
Protect
Our Planet! ♥

A Sort them.

Tick producer or consumer for each living thing.

Living Thing	Producer	Consumer
 grass	☒	☐
 rabbit	☐	☒
 tree	☒	☐
 fox	☐	☒
 algae	☒	☐
 fish	☐	☒

B Match each word to its meaning.

1. producer

2. consumer

3. predator

4. prey

A. an animal hunted
by another animal

B. a living thing that
eats plants or animals

C. a living thing that
makes its own food

D. an animal that hunts
other animals

C Write producer or consumer.

-  sunflower producer
-  cow consumer
-  seaweed producer
-  owl consumer

D Explain.

How is a producer different from a consumer?

A producer makes its own
food using sunlight.

A consumer gets energy by
eating plants or other animals.

Topic 5: Food Chains & Ecosystems | Answer Sheet 4

Healthy
Ecosystems
Happier
Worlds! ♥

A

Name: _____ Date: _____

Look at the food web.

Arrows show energy moving to the eater.

B

Answer the questions.

- Name two animals that eat plants. rabbit and mouse
- Which animal eats the mouse? owl
- Which animal eats the grasshopper? frog
- What might happen to rabbits if there is less grass? _____
Rabbits may have less food and their numbers may go down.
- What might happen to foxes if there are fewer rabbits? _____
Foxes may have less food and may need to eat other animals.

C

True or False?

Circle the correct answer.

- An owl is a producer. ☐ True ☒ False
- A rabbit is a consumer. ☒ True ☐ False
- Grass gets energy from the sun. ☒ True ☐ False
- If there are fewer mice, the owl may have less food. ☒ True ☐ False

D

Challenge

Explain how one change in a food web can affect other living things.

If one part of a food web changes, other living things may have less food or may have to move. For example, if there is less grass, rabbits may decrease and foxes may have less to eat.
