

Elementary Science

Animals and Their Habitats

Topic 4: Habitats | Worksheet 1

Name: _____ Date: _____

A Match each animal to its habitat.

polar bear

camel

dolphin

frog

monkey

fox

rainforest

Arctic

pond

desert

ocean

forest

B Circle the best habitat.

1. Which habitat does a frog live in?

pond

desert

Arctic

2. Which habitat does a camel live in?

desert

ocean

rainforest

3. Which habitat does a fox live in?

forest

ocean

pond

C Fill in the blanks using the word bank.

Word Bank

habitat

food

water

shelter

1. A habitat gives animals _____.
2. A habitat gives animals _____.
3. A habitat gives animals _____.
4. A habitat is a safe place called _____ for living things.

D Challenge: Draw one more animal and its habitat.

My animal is a _____.

It lives in the _____.

Habitats give animals food, water, shelter and space.

A Look at the habitats. Fill in the blanks using the word bank.

Word Bank

hot cold wet dry trees sand water plants shady icy grassy rocks

Forest

It has _____.
It is _____.

Desert

It is _____.
It has _____.

Ocean

It has _____.
Many animals live here among _____.

Arctic

It is _____.
It has _____.

Pond

It is _____.
It has _____.

Grassland

It is _____.
Many animals live here among _____.

B Circle the habitat that matches each clue.

-  This habitat is hot and dry.

forest
desert
ocean
-  This habitat is cold and icy.

Arctic
grassland
pond
-  This habitat has lots of water and fish.

ocean
desert
forest
-  This habitat has grass and open space.

grassland
Arctic
ocean

C Tick the things an animal might find in a pond.

- | | | |
|--|---|---|
| 
☐ water | 
☐ sand | 
☐ lily pads |
| 
☐ cactus | 
☐ reeds | 
☐ fish |

D Explain: Why do different animals live in different habitats?

A Read the clues and choose the animal.

Word Bank

polar bear

camel

fish

penguin

frog

monkey

- I have thick fur and a layer of fat to keep me warm. _____
- I can live a long time with little water and I have wide padded feet. _____
- I have gills to breathe underwater. _____
- I have webbed feet and feathers for swimming in cold water. _____
- I have strong back legs and I live near water. _____
- I have a tail and strong hands for climbing trees. _____

B Match the adaptation to what it helps the animal do.

Adaptation

What it helps the animal do

helps it move on sand

helps it stay warm

helps it breathe underwater

helps it swim

Different Adaptations Help Animals Survive! ♥

Same Planet Different Superpowers!

C True or False?

Read each sentence. Circle True or False.

- A camel's feet help it walk on sand. True False
- A fish uses lungs to breathe underwater. True False
- A penguin's body helps it swim. True False
- A polar bear's fur helps keep it warm. True False

Adaptations Help Animals Live in Their Habitats! ♥

D Explain: What is an adaptation?

Write your answer on the lines below.

Curious Minds Brighter Futures! ♥

Nature Teaches Us Amazing Things!

Kind People Care for Animals and Their Homes! ♥

Elementary Science

Changing Habitats

Topic 4: Habitats | Worksheet 4

Name: _____ Date: _____

A Look at the pictures. What has changed?

1

A forest

Before

After

What happened? _____

How might this affect animals? _____

2

The ocean

Before

After

What happened? _____

How might this affect animals? _____

3

A pond

Before

After

What happened? _____

How might this affect animals? _____

B Choose the best way to help.

1. A forest is being cut down.

- ☐ plant more trees
- ☐ throw rubbish
- ☐ build more roads

2. A river is dirty.

- ☐ clean it up
- ☐ add more plastic
- ☐ waste water

3. A pond is drying out.

- ☐ save water
- ☐ pour oil in
- ☐ scare animals away

4. Animals have lost their homes.

- ☐ protect habitats
- ☐ cut more trees
- ☐ pollute the area

C Tick the good ideas.

recycle

☐

save water

☐

plant trees

☐

protect wildlife

☐

leave litter

☐

pollute rivers

☐

D Explain: Why should we protect habitats?

We can all help protect habitats! ♥

Healthy Habitats

Animals and Their Habitats

Level 1

Topic 4: Habitats | Answer Sheet 1

Name: **Answer Key**

Date: **April 25, 2025**

Amazing Animals Brighter World! ♥

A Match each animal to its habitat.

B Circle the best habitat.

C Fill in the blanks using the word bank.

Word Bank

habitat food water shelter

1. A habitat gives animals **food**.
2. A habitat gives animals **water**.
3. A habitat gives animals **shelter**.
4. A habitat is a safe place called **habitat** for living things.

D Challenge: Draw one more animal and its habitat.

My animal is a **bird**.
It lives in the **forest**.

Habitats give animals food, water, shelter and space.

Great job! ♥

Nature Is Home For Everyone!

What Makes a Habitat? — Answer Key

Habitats • Level 2

A. Fill in the blanks for each habitat (word bank includes hot, cold, wet, dry, trees, sand, water, plants, shady, icy, grassy, rocks).

Forest. It has _____. It is _____.

Answer: It has trees. It is shady.

Desert. It is _____. It has _____.

Answer: It is hot (or dry). It has sand.

Ocean. It has _____. Many animals live here among _____.

Answer: It has water. Many animals live here among rocks.

Arctic. It is _____. It has _____.

Answer: It is cold (or icy). It has ice/snow.

Pond. It is _____. It has _____.

Answer: It is wet. It has plants.

Grassland. It is _____. Many animals live here among _____.

Answer: It is grassy. Many animals live here among plants/grasses.

B. Circle the habitat that matches each clue.

1. This habitat is hot and dry — forest, desert, or ocean?

Answer: desert

2. This habitat is cold and icy — Arctic, grassland, or pond?

Answer: Arctic

3. This habitat has lots of water and fish — ocean, desert, or forest?

Answer: ocean

4. This habitat has grass and open space — grassland, Arctic, or ocean?

Answer: grassland

C. Tick the things an animal might find in a pond.

1. **water**

Answer: Yes — tick it

2. **sand**

Answer: No — that's a desert/beach feature

3. **lily pads**

Answer: Yes — tick it

4. **cactus**

Answer: No — that's a desert plant

5. **reeds**

Answer: Yes — tick it

6. **fish**

Answer: Yes — tick it

D. Why do different animals live in different habitats?

Answer: Different animals have different needs — food, water, shelter and temperature — and their bodies are suited to a particular environment, so each animal lives where it can get everything it

What Makes a Habitat? — Answer Key (continued)

needs to survive.

Amazing Adaptations — Answer Key

Habitats • Level 3

A. Read the clues and choose the animal (word bank: polar bear, camel, fish, penguin, frog, monkey).

1. I have thick fur and a layer of fat to keep me warm.

Answer: polar bear

2. I can live a long time with little water and I have wide padded feet.

Answer: camel

3. I have gills to breathe underwater.

Answer: fish

4. I have webbed feet and feathers for swimming in cold water.

Answer: penguin

5. I have strong back legs and I live near water.

Answer: frog

6. I have a tail and strong hands for climbing trees.

Answer: monkey

B. Match the adaptation to what it helps the animal do.

1. thick fur

Answer: helps it stay warm

2. webbed feet

Answer: helps it swim

3. gills

Answer: helps it breathe underwater

4. padded feet

Answer: helps it move on sand

C. True or False?

1. A camel's feet help it walk on sand.

Answer: True

2. A fish uses lungs to breathe underwater.

Answer: False — fish use gills, not lungs.

3. A penguin's body helps it swim.

Answer: True

4. A polar bear's fur helps keep it warm.

Answer: True

D. What is an adaptation?

Answer: An adaptation is a special body part or behaviour an animal or plant has that helps it survive in its habitat — for example, finding food, staying warm or cool, moving around, or staying safe from predators.

Changing Habitats — Answer Key

Habitats • Level 4

A. Look at the before/after pictures — what has changed?

Forest. A full green forest, then the same area with most trees cut down. What happened, and how might it affect animals?

Answer: The trees were cut down (deforestation). Animals that lived there lose their homes, shelter and food, and must move away or may not survive.

Ocean. A clean blue ocean with coral and fish, then the same ocean with plastic bottles and rubbish floating in it. What happened, and how might it affect animals?

Answer: The ocean became polluted with plastic litter. Sea animals can get sick, hurt or tangled in the rubbish, or accidentally eat plastic, and the pollution can damage coral.

Pond. A pond full of water with lily pads and a frog, then the same area dried into cracked mud. What happened, and how might it affect animals?

Answer: The pond dried up (drought). Animals like frogs and fish that need the water lose their home and may die or be forced to move to find water elsewhere.

B. Choose the best way to help.

1. A forest is being cut down — plant more trees, throw rubbish, or build more roads?

Answer: plant more trees

2. A river is dirty — clean it up, add more plastic, or waste water?

Answer: clean it up

3. A pond is drying out — save water, pour oil in, or scare animals away?

Answer: save water

4. Animals have lost their homes — protect habitats, cut more trees, or pollute the area?

Answer: protect habitats

C. Tick the good ideas.

1. recycle

Answer: Yes — tick it

2. plant trees

Answer: Yes — tick it

3. leave litter

Answer: No — don't tick it

4. save water

Answer: Yes — tick it

5. protect wildlife

Answer: Yes — tick it

6. pollute rivers

Answer: No — don't tick it

D. Why should we protect habitats?

Answer: Habitats give animals and plants the food, water, shelter and space they need to survive — protecting them keeps animals safe and keeps nature and our planet healthy.
