My Five Senses

Level 1

Name: _____ Date: _____

A Match each sense to the body part.

- | | | | | |
|------------|---|---|--|--------|
| 1. sight | • | • |  | tongue |
| 2. hearing | • | • |  | ears |
| 3. smell | • | • |  | nose |
| 4. taste | • | • |  | eyes |
| 5. touch | • | • |  | hands |

B Circle the best sense.

1. Which sense helps you hear music?

hearing

taste

smell

2. Which sense helps you smell flowers?

touch

smell

sight

3. Which sense helps you see a rainbow?

hearing

sight

taste

4. Which sense helps you feel a soft teddy?

touch

smell

hearing

C Fill in the blanks using the word bank.

Word Bank:

eyes

ears

nose

tongue

skin

- We see with our _____.
- We hear with our _____.
- We smell with our _____.
- We taste with our _____.
- We feel touch with our _____.

Amazing senses!
Amazing you!

D Challenge: Draw or write one thing you can use each sense for.

sight

hearing

smell

taste

touch

Our senses help us learn about the world!

Elementary Science

Body Parts and Organs

Name: _____ Date: _____

A Match each body part or organ to its job.

- heart •  helps you think
- lungs •  helps you breathe
- stomach •  helps digest food
- brain •  pumps blood around your body

B Circle the best answer.

1. Which part helps you breathe?

lungs

stomach

heart

2. Which part pumps blood?

brain

heart

teeth

3. Which part helps you think?

brain

lungs

skin

4. Which part helps digest food?

stomach

ears

bones

C Fill in the blanks using the word bank.

Word Bank:

heart

lungs

brain

stomach

body

- The _____ pumps blood.
- The _____ help us breathe.
- The _____ helps us think.
- The _____ helps break down food.
- These parts work together in your _____.

Your body is amazing! ♥

Body Systems Working Together — Answer Key

Human Body and Senses • Level 4

A. Match each body system to its job.

1. respiratory system

Answer: helps you breathe

2. digestive system

Answer: breaks down food

3. circulatory system

Answer: carries blood and oxygen

4. skeletal and muscular system

Answer: moves your body

B. Sam is running at the park — his heart beats faster, he breathes faster, and his legs move.

1. Which system helps you breathe faster when you run?

Answer: The respiratory system.

2. Which system moves your arms and legs?

Answer: The skeletal and muscular system.

3. Which system carries oxygen around your body?

Answer: The circulatory system.

4. Why do body systems need to work together?

Answer: Each system has its own job, and the body needs all of them working together at the same time to run, breathe and move safely.

C. True or False?

1. The digestive system helps break down food.

Answer: True

2. The respiratory system helps you hear.

Answer: False — the respiratory system helps you breathe; hearing is done by the ears.

3. Your body systems work together.

Answer: True

4. Muscles and bones help you move.

Answer: True

D. What could happen if one body system did not work properly?

Answer: It could affect the whole body — for example, if the respiratory system didn't work well, the body wouldn't get enough oxygen, which would also affect the circulatory system and make it hard to be active.
