Parts of a Plant

LEVEL 1

Plants
Make Our
World
Brighter! ♥

Name: _____
Date: _____

A. Label the parts of the plant.
Use the words in the word bank.

Word Bank

roots

stem

leaves

flower

Plants have different parts that work together! ♥

Plants help make clean air! ♥

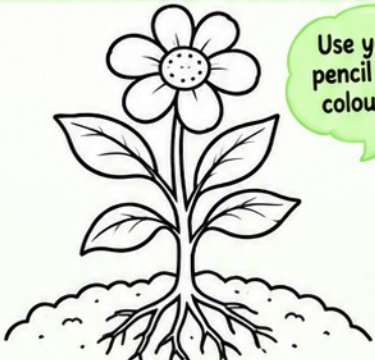

B. Match each plant part to its job.

roots	☐	☐ takes in water
stem	☐	☐ holds the plant up
leaves	☐	☐ makes food
flower	☐	☐ makes seeds

C. Circle the roots. Colour the flower.

Use your pencil and colours! ♥

D. Challenge: Draw one more plant.

Amazing Plants Everywhere! ♥

Green Plants Happier Futures! ♥

Be Creative! Every plant is special! ♥

Science today a brighter tomorrow! ♥

Topic 2: Plants | Worksheet 1

A. Tick the things a plant needs.

Plants need certain things to grow and stay healthy!

☐ Water

☐ Light

☐ Air

☐ Nutrients

☐ Toy car

☐ Ice cream

B. Circle the plant that will grow best.

Look at what each plant has. Which one will be the healthiest?

Sunlight Water

Plant 1

No water

Plant 2

No light

Plant 3

C. Fill in the blanks using the word bank.

- Roots take in _____ and nutrients.
- Leaves use _____ to help make food.
- Plants need _____ to breathe.
- Plants need _____ to stay alive.

Word Bank

water

air

light

nutrients

Healthy plants make our world a brighter, happier place!

D. Explain: Why does a plant need water?

Think and write your ideas!

Science today a brighter tomorrow!

Topic 2: Plants | Worksheet 2

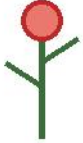

Plants Help Make a Greener, Happier World!

Plant Life Cycle

Plants • Level 3 • Worksheet 3

Name: _____ Date: _____

A. Write 1-5 in the circles to show the correct order of the plant life cycle.

 Flowering Plant	 Seed	 Fruit & Seeds	 Seedling	 Sprout

B. Fill in the blanks using the word bank.

Word bank: seed, sprout, seedling, adult plant, flower

1. A _____ begins the life cycle.
2. A _____ is a young plant.
3. An _____ grows bigger and stronger.
4. A _____ can make new seeds.

C. True or False? Circle the correct answer.

1. Seeds can grow into new plants. True / False
2. A seedling is an old plant. True / False
3. Flowers can make seeds. True / False
4. Plants stay the same size forever. True / False

D. What happens after a seed gets water and warmth?

Discoveries! ♥

Name: _____ Date: _____

A. A simple experiment. Look at the pictures.
Two plants are the same. We change only the water.

Let's find out
what plants need
to grow! ♥

At the start

Plant A

Water ✓
Light ✓

Plant B

Water ✗
Light ✓

After one week...

After one week

Plant A

Tall and healthy!

Plant B

Small and droopy!

B. Results. Fill in the table.

Plant	Height (cm)	Leaf condition
Plant A	12 cm	Green leaves
Plant B	4 cm	Droopy leaves

Water helps
plants grow
and stay
healthy! ♥

C. Answer the questions.

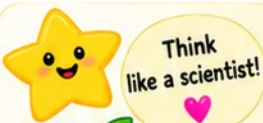

- 1 Which plant grew better? _____
- 2 What was changed in the experiment? Circle the correct answer.

water
pot
soil
- 3 Which plant was taller? _____
- 4 What can we conclude? _____

Plants need
water and light
to grow! ♥

D. Challenge: What do you think will happen if a plant gets no light?

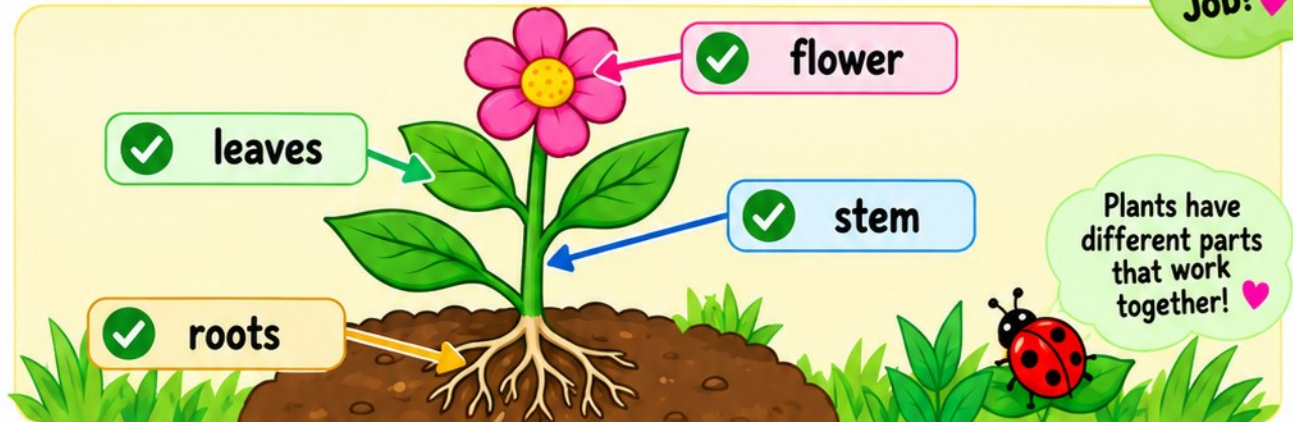

Think
like a scientist! ♥

Grow!

Name: _____ Date: _____

A. Tick the things a plant needs.

Plants need these things to grow and stay healthy! ♥

 ☒ Water	 ☒ Light	 ☒ Air	 ☒ Nutrients	 ☐ Toy car	 ☐ Ice cream
--	--	--	--	---	---

B. Circle the plant that will grow best.

This plant has everything it needs to grow! ♥

 No water	 Sunlight and water	 No sunlight
--	---	---

C. Fill in the blanks with the correct words.

Plants use water, light, air and nutrients to grow! ♥

- 1 Roots take in water and nutrients.
- 2 Leaves use light to help make food.
- 3 Plants need air to breathe.
- 4 Plants need water to stay alive.

D. Why does a plant need water?

Great answer! ♥

Water helps a plant grow and stops it drying out.

Plant Life Cycle — Answer Key

Plants • Level 3

A. Write 1-5 in the circles to show the correct order of the plant life cycle.

Correct order of the five stages:

Answer: 1 Seed → 2 Sprout → 3 Seedling → 4 Flowering Plant (flowers, no fruit yet) → 5 Fruit & Seeds (the flower has been pollinated and now makes fruit and new seeds).

B. Fill in the blanks using the word bank.

1. A _____ begins the life cycle.

Answer: seed

2. A _____ is a young plant.

Answer: seedling

3. An _____ grows bigger and stronger.

Answer: adult plant

4. A _____ can make new seeds.

Answer: flower

C. True or False?

1. Seeds can grow into new plants.

Answer: True

2. A seedling is an old plant.

Answer: False — a seedling is a young plant.

3. Flowers can make seeds.

Answer: True

4. Plants stay the same size forever.

Answer: False — plants grow and change size as they go through their life cycle.

D. What happens after a seed gets water and warmth?

Answer: It germinates (sprouts): the seed coat opens, a root grows down into the soil and a small shoot grows up toward the light, and it begins to grow into a seedling.

A. Look at the experiment and the results.

We change one thing to see how it affects plant growth!

Both plants are the same kind and start the same size!

Results after 2 weeks

Plant	Height (cm)	Looks like
Plant A	15 cm	 Healthy, green leaves
Plant B	4 cm	 Small, weak, pale leaves

B. Read the questions and write the correct answers.

1 Which plant grew better?

Plant A

2 What was changed in the experiment?

water

3 Which plant was taller?

Plant A

4 What can we conclude?

Plants need water to grow well.

C. Challenge: Predict what will happen.

What do you think will happen to a plant if it does not get any light?

Think like a scientist!

Without light, a plant will grow badly, turn pale, and may die.
