Day & Night

Level 2

Topic 12: Earth & Space | Answer Sheet 2

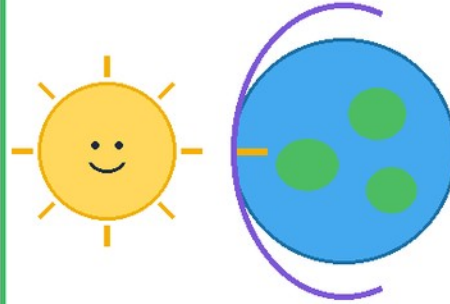

Name: _____

Date: _____

A Day or night?

1. The Sun is high in the sky. ☒ day ☐ night
2. You can see many stars. ☐ day ☒ night
3. You eat breakfast before. ☒ day ☐ night
4. You are sleeping in bed. ☐ day ☒ night

B Why do we get day and night?

Earth spins once every 24 hours. The side facing the Sun has day. The side facing away has night.

C True or False?

1. Earth spins on its axis. ☒ True ☐ False
2. The Sun moves around Earth every day. ☐ True ☒ False
3. One full spin of Earth takes about 24 hours. ☒ True ☐ False
4. Night happens because the Sun switches off. ☐ True ☒ False

D Explain: Why is it night in some places?

It is night in places on the side of Earth facing away from the Sun. As Earth spins, those places later turn toward the Sun and have daytime.

Earth keeps spinning — day becomes night!
