Name: \_\_\_\_\_

Date: \_\_\_\_\_

### A. Match the force to what it does.

Draw a line from each picture and word to the correct meaning.

|                                                                                       |                                  |
|---------------------------------------------------------------------------------------|----------------------------------|
| 1    | • moves something away from you  |
| 2    | • pulls things down toward Earth |
| 3   | • can attract some metal objects |
| 4  | • brings something closer to you |

gravity      push      pull      magnet

### B. Circle the best answer.

Look at each question. Which answer is correct?

|                                                                                                                               |                                                                                                                   |
|-------------------------------------------------------------------------------------------------------------------------------|-------------------------------------------------------------------------------------------------------------------|
| 1 What makes an apple fall from a tree?<br> | 2 Which is a pull?<br>         |
| wind   gravity   sound                                                                                                        | opening curtains   kicking a ball   pushing a cart                                                                |
| 3 Which is a push?<br>                     | 4 What can a magnet pull?<br> |
| pulling a wagon   shutting a door   tugging a rope                                                                            | paper   some metal objects   water                                                                                |

### C. Fill in the blanks using the word bank.

Word bank: gravity   push   pull   magnet   down

- Earth pulls things \_\_\_\_\_.
- A \_\_\_\_\_ can attract some metal objects.
- Opening a drawer is a \_\_\_\_\_.
- Shutting a gate can be a \_\_\_\_\_.
- \_\_\_\_\_ is the force that pulls things toward Earth.

### D. How are push, pull and gravity different?

Write a short explanation in your own words.
