

Amazing Adaptations — Answer Key

Habitats • Level 3

A. Read the clues and choose the animal (word bank: polar bear, camel, fish, penguin, frog, monkey).

1. I have thick fur and a layer of fat to keep me warm.

Answer: polar bear

2. I can live a long time with little water and I have wide padded feet.

Answer: camel

3. I have gills to breathe underwater.

Answer: fish

4. I have webbed feet and feathers for swimming in cold water.

Answer: penguin

5. I have strong back legs and I live near water.

Answer: frog

6. I have a tail and strong hands for climbing trees.

Answer: monkey

B. Match the adaptation to what it helps the animal do.

1. thick fur

Answer: helps it stay warm

2. webbed feet

Answer: helps it swim

3. gills

Answer: helps it breathe underwater

4. padded feet

Answer: helps it move on sand

C. True or False?

1. A camel's feet help it walk on sand.

Answer: True

2. A fish uses lungs to breathe underwater.

Answer: False — fish use gills, not lungs.

3. A penguin's body helps it swim.

Answer: True

4. A polar bear's fur helps keep it warm.

Answer: True

D. What is an adaptation?

Answer: An adaptation is a special body part or behaviour an animal or plant has that helps it survive in its habitat — for example, finding food, staying warm or cool, moving around, or staying safe from predators.
