Material Properties

Level 2

Explore Investigate Learn Growing Scientists Every Day!

Materials have different properties. They help us in different ways!

Look closer! Materials have amazing properties!

A Match each property to its meaning.

Draw a line from each property to the matching meaning.

hard

feels uneven or bumpy

soft

not easy to squash

waterproof

lets light through

transparent

easy to squash or feel soft

flexible

can bend without breaking

rough

does not let water through easily

B Circle the best property.

Choose the most suitable property for each object.

1. A pillow is usually:

soft

hard

rough

2. A glass window is usually:

transparent

waterproof

fluffy

3. A raincoat should be:

waterproof

rough

crunchy

4. A rubber band is usually:

flexible

glassy

hard

C Fill in the blanks using the word bank.

Word bank:

hard

soft

waterproof

transparent

flexible

rough

- A rock is _____.
- A sponge feels _____.
- A window is _____.
- An umbrella should be _____.
- A rubber band is _____.
- Tree bark can feel _____.

D Explain: Why is a raincoat a good material for rainy weather?
