

# Plant Life Cycle — Answer Key

Plants • Level 3

---

## A. Write 1-5 in the circles to show the correct order of the plant life cycle.

**Correct order of the five stages:**

Answer: 1 Seed → 2 Sprout → 3 Seedling → 4 Flowering Plant (flowers, no fruit yet) → 5 Fruit & Seeds (the flower has been pollinated and now makes fruit and new seeds).

## B. Fill in the blanks using the word bank.

1. A \_\_\_\_\_ begins the life cycle.

Answer: seed

2. A \_\_\_\_\_ is a young plant.

Answer: seedling

3. An \_\_\_\_\_ grows bigger and stronger.

Answer: adult plant

4. A \_\_\_\_\_ can make new seeds.

Answer: flower

## C. True or False?

1. Seeds can grow into new plants.

Answer: True

2. A seedling is an old plant.

Answer: False — a seedling is a young plant.

3. Flowers can make seeds.

Answer: True

4. Plants stay the same size forever.

Answer: False — plants grow and change size as they go through their life cycle.

## D. What happens after a seed gets water and warmth?

Answer: It germinates (sprouts): the seed coat opens, a root grows down into the soil and a small shoot grows up toward the light, and it begins to grow into a seedling.
