

A. Look at the experiment and the results.

We change one thing to see how it affects plant growth!

Both plants are the same kind and start the same size!

Results after 2 weeks

Plant	Height (cm)	Looks like
Plant A	15 cm	 Healthy, green leaves
Plant B	4 cm	 Small, weak, pale leaves

B. Read the questions and write the correct answers.

1 Which plant grew better?

Plant A

2 What was changed in the experiment?

water

3 Which plant was taller?

Plant A

4 What can we conclude?

Plants need water to grow well.

C. Challenge: Predict what will happen.

What do you think will happen to a plant if it does not get any light?

Think like a scientist!

Without light, a plant will grow badly, turn pale, and may die.

Science today a brighter tomorrow!
