

Measuring the Weather — Answer Key

Weather and Water • Level 2

A. Match each tool to its job.

1. thermometer

Answer: shows how hot or cold it is

2. rain gauge

Answer: measures how much rain falls

3. windsock

Answer: shows which way the wind is blowing

4. weather chart

Answer: records the weather each day

B. Circle the best answer.

1. Which tool measures temperature — thermometer, umbrella, or kite?

Answer: thermometer

2. Which tool can show how much rain fell — rain gauge, sunglasses, or fan?

Answer: rain gauge

3. Which tool helps us record daily weather — weather chart, book, or toy box?

Answer: weather chart

4. Which weather would make a windsock move most — sunny, windy, or snowy?

Answer: windy

C. Fill in the blanks (word bank: thermometer, rain, wind, chart, weather).

1. A _____ helps us measure temperature.

Answer: thermometer

2. A rain gauge measures _____.

Answer: rain

3. A windsock shows the _____.

Answer: wind

4. A weather _____ helps us record the day.

Answer: chart

5. Scientists observe the _____.

Answer: weather

D. Why do weather tools help us?

Answer: They tell us what to expect — a thermometer says if it will be hot or cold, a rain gauge says how much it rained — so we can choose the right clothes and plan safe activities.
